"I want to reach the Southwest ing too much money for circulation that goes into the East."

This was the statement of a well-known St. Louis manufacturer who, while anxious to extend his trade Eastward, wanted first to influence trade already established.

The radius of a newspaper's direct influence is pretty well defined and no "waste" circulation need be used. But ometimes it is desirable to add magazines of national Those having the circulatio greatest per ce ! of Western circulation - ! influence may then be chosen. But how about the circulation of these? More than one manufacturer has found this "waste" circulation of as great value as that in the "home territory." It has been the best and the least expensive missionary work ever undertaken; it has given his salesmen, and his goods, an introduction to the trade and to the consumer, the value of which could not be measured in dollars and cents.

New cases, 15; total to date, 2,235.

Deaths, 2; total to date, 434.

New focl. 4; cases under treatment, 125; cases discharged, 2,756.

New Orleans, I.a., Oct. 16.—Believing that yellow fever in New Orleans is now absolutely under control, Doctor White, representing the Marine Hospital Service, considers that hereafter the inclusion of cases other than yellow in the official record ought to be avoided.

At the same time he believes that not a single actual case of the disease should be suppressed.

The record of cases to-day was again a low one and that of deaths gave general satisfaction to the authorities.

It is announced that the Marine Hospital Service will not take charge of the situation at Patterson. Doctor Corput's report has satisfied Doctor White that it is impossible to seture the necessary co-operation of citisens and officials. The fever is, therefore, likely to continue at Patterson until frost.

The Civil Listrict Court opened to-day and the building was crowded with lawyers and others. It is situated in the heart of what was the originally infected district.
